How far can universal design increase digital accessibility and stimulate innovation?

Children with disabilities not being able to go to a "normal" school - with special support, but this has definitely allowed him to develop in mainstream education. Now the whole town knows about him, and he is very much included in the society. So to say, from a very early age, he was able to choose which level to go to.

Tax incentives and exemptions for persons with disabilities (Ghana, Kenya …)

Quality of life the best output where there is a driver for social change

Akin to how we source and develop data (often not used as well as they might be)

Funding things we already know are working

As an innovation lever

Inability of mental health and mental data

People with disabilities need to know their possible solutions!

Support from BMZ and GIZ for this event at IGF 2020

Questions

Theme

What do we need to do to persuade governments?

How can development cooperation add a positive note from the Netherlands? :)
